

Armenia outdoor power supply general distributor

How does Armenia produce electricity?

Armenia lacks fossil energy source, and heavily relies on the production of electricity from a nuclear power plant and hydro power plants, and uses imported fossil fuels to operate thermal power plants. Solar energy and wind energy productions are just a small portion of the overall electricity production.

How are electricity supplier prices determined in Armenia?

Electricity supplier prices are determined by the Settlement Center of Ministry of Energy Infrastructures and Natural Resources of Armenia. Solar installations of 150 kW or less are allowed to sell their excess energy back to the electrical grid.

Can large consumers switch suppliers in Armenia?

Large consumers (not households) can switch suppliers. Depending on the amount of electricity consumed, the Government of Armenia subsidizes electricity bills of consumers who utilize less than 500 kWh of electricity per month. Customers are billed monthly in kWh.

What types of power supplies can I import and sell?

Import and sale: low- and high-power diesel and petrol generators, cogeneration stations, electrical equipment, power transformers, automatic transfer switches, uninterruptible power supplies (UPS), microprocessor controlled voltage and frequency stabilizers, solar inverters, battery chargers

Will Armenia keep promise to subsidize electricity prices?

Ministry Of Energy Infrastructures and Natural Resources Of The Republic Of Armenia. Retrieved 26 November 2016. ^ a b "Armenian Government Says it will Keep Promise to Subsidize Electricity Prices". Asbarez. 17 September 2015. Retrieved 26 November 2016. ^ Oliphant, Roland (25 June 2015). "Armenia's 'Electric Yerevan' protests enter seventh day".
