

The European Commission has selected 85 innovative net-zero projects under its 4th Innovation Fund round for EUR4.8 billion in grants, including ...

EliTe Solar has announced plans to build an 8GW cell and module manufacturing facility in the Suez Canal Economic Zone (SCZONE) in Egypt.

Spanning 13 hectares, the newly operational Agri-PV Nickelsdorf I is a testament to the innovative fusion of solar power production and ...

At the new location in Carinthian Liebenfels, Energetica will produce five million square meters of photovoltaic modules annually in one of the world's first production plants at Industry 4.0 level.

The Austrian government has decided to introduce a "Made in Europe" bonus for PV projects above 35 kW in size with solar modules that are manufactured in Europe.

Austria's largest PV roof project has gone into operation on the 85,000-square-meter site roofs of Steyr Automotive. The ~7.5 MWp system was installed ...

Module manufacturer Energetica is building a new module factory with an annual production capacity of one gigawatt in Liebenfels near Klagenfurt. The company wants to ...

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

At the new location in Carinthian Liebenfels, Energetica will produce five million square meters of photovoltaic modules annually in one of the world's first ...

In summary, factory audits empower stakeholders to make informed decisions on manufacturer selection, enhance equipment quality for their projects, and proactively manage risks ...

VP Solar has recently added Sonnenkraft's Kioto Solar photovoltaic modules to its range of products, available for both Italy and ...

Energetica invests in Europe's largest and at that time the world's most modern photovoltaic module factory. Future PV innovations are to be developed in an integrated research facility.

Austria's new photovoltaic module factory

International, integrated oil and gas company OMV together with Austria's leading electricity company VERBUND, began construction today on ...

A solar PV integrated polysilicon to module factory can be globally competitive in Europe (Germany or Poland) if it reaches 5 GW capacity. The EU industry set itself the objective of ...

Explore Austria's potential for solar module production. This guide assesses its industrial sites, energy grid, logistics, and digital readiness for investors.

The Austrian Ministry of Economic Affairs and Energy has announced a "Made in Europe" bonus of 20% to government funding for PV ...

Currently 4 manufacturers of PV Modules are operational in Austria: Kioto Photovoltaics GmbH, Energetica-Photovoltaic industries, DAS Energy Ltd. as well as Ertex-Solartechnik GmbH; ...

International, integrated oil and gas company OMV together with Austria's leading electricity company VERBUND, began construction today on the largest area photovoltaic ...

Spanning 13 hectares, the newly operational Agri-PV Nickelsdorf I is a testament to the innovative fusion of solar power production and agricultural land use. This groundbreaking ...

Austria expects over two gigawatts of new solar power; investment grants approved. Open space expansion remains a challenge for industry ...

Austria's Ministry of the Economy, Energy and Tourism (BWET) has launched the 2nd funding round for 2025 for solar PV systems with a total budget of EUR40 million. For the first ...

The country's annual solar PV additions in 2023 totaled 2.6 GW (see Austrian Solar PV Market Grew By 2.6 GW In 2023). PV Austria's ...

Module manufacturer Energetica is building a new module factory with an annual production capacity of one gigawatt in Liebenfels near ...

Austria has installed Europe's largest photovoltaic-thermal (PVT) solar system at a stadium, using Sunmaxx modules combined with ...

The Austrian Ministry of Economic Affairs and Energy has announced a "Made in Europe" bonus of 20% to government funding for PV and energy storage projects that use ...

Explore Austria's potential for solar module production. This guide assesses its industrial sites, energy grid,

Austria's new photovoltaic project module factory

logistics, and digital readiness for ...

Ab dem 23. Juni 2025 können PV-Projekte in Österreich mit einem neuen Bonus punkten - dem „Made in Europe“-Zuschlag. Wer bei Modulen, ...

Austria expects over two gigawatts of new solar power; investment grants approved. Open space expansion remains a challenge for industry growth.

The Austrian government has decided to introduce a "Made in Europe" bonus for PV projects above 35 kW in size with solar modules that ...

3SUN Gigafactory Catania's "Sun Factory," where high-efficiency solar cells and modules are made, is Europe's largest center for the production of next-generation photovoltaic modules.
