

How many hydroelectric power projects are there in Bolivia?

There are currently sixproposed hydroelectric power projects (HPP) in Bolivia. Of the six, only two have been completed--the San Jose I HPP in 2018 and the San Jose II in June 2019--and are both now producing energy to the national grid.

Does China support hydropower projects in Bolivia?

In line with the push for environmentally friendly Belt and Road Initiative (BRI) infrastructure projects and Bolivia's former President Evo Morales' "2025 Patriotic Agenda" to transform Bolivia into a regional energy hub, China has supported six hydropower energy projects in the country.

How many infrastructure projects will China and Bolivia build?

In 2015, China and Bolivia signed an official agreement for China to construct 13 infrastructure projects, including the Chepete-El Bala Complex.

Are Bolivia's hydroelectric power projects destroying indigenous peoples?

While the hydroelectric power projects are meant to expand Bolivia's clean energy supply, the projects have had damaging consequences, including the displacement of indigenous peoples and destruction of the wildlife and biodiversity, countering Morales' platform championing indigenous rights.

How much electricity does Bolivia use?

In 2011, the installed capacity connected to Bolivia's National Grid System (SIN) was 1.31 gigawatts (GW). While electricity generation has increased since then, it remains largely dependent on natural gas, rather than renewable sources.

What are the success factors of community development in Bolivia?

Regarding community development success factors, there are notable positives including the improvement and development of roads and the generation of employment opportunities for 3,000 people, 80% of whom are Bolivian--not Chinese--laborers.
