

Brunei outdoor power supply factory

What energy sources does Brunei use?

The DES operates a diesel power plant (Belingos) and four natural gas power stations (Gadong 1A, Gadong 2, Bukit Panggal, and Lumut). In recent years, Brunei has recognised the need to diversify its energy sources and has set a goal of including 10% renewable energy sources in its energy mix by 2035.

How many power plants are there in Brunei?

These five power plants provide about 58% of the country's electrical needs, mainly serving residential areas. The Brunei National Energy Company (BNEC) is the state-owned utility company that operates and manages the electricity supply network in the country.

Is Brunei a reliable country?

Brunei's power sector has shown reliability, with the government investing in upgrades and modernizations to ensure uninterrupted power delivery. Natural gas is the dominant energy source in Brunei, with the country's electricity sector relying heavily on this resource for power generation.

How important is natural gas in Brunei?

In 2010, natural gas accounted for 99% of Brunei's electricity generation, a significant proportion that highlights its importance in the country's energy mix. This trend has continued, with natural gas supplying 75.6% of the nation's total energy needs in 2005.
