

Why does Cuba have a bad energy system?

Cuba's energy system also suffers from years of reliance on domestic, poor-quality heavy crude oil, which is corrosive because it's high in sulfur. This has accelerated the wear and tear on boilers, turbines, and pipes in Cuba's power plants, shortening their life spans and causing frequent and costly outages.

Why are there so many power outages in Cuba?

The frequent power outages can be attributed to a daily shortfall of 80,000 barrels of fuel, based on 2022 data. In 2024, the Cuban government reduced this amount by 20,000 barrels per day.

Did a malfunction at Cuba's biggest thermoelectric plant cause a power outage?

The Ministry of Energy and Mines said on social platform X the latest outage could be tied to a malfunction at one of Cuba's biggest thermoelectric plants. Argelio Abad, the ministry's vice minister, said on state TV the grid shut down after an apparently erroneous message warning of overheating disconnected the thermoelectric plant.

Why is there a blackout in Cuba?

It was the second island-wide outage this year, with three other blackouts reported late last year. The Ministry of Energy and Mines said on social platform X the latest outage could be tied to a malfunction at one of Cuba's biggest thermoelectric plants.

Is Cuba running out of energy?

CiberCuba /Canal Caribe - Image of © Miguel Díaz-Canel and the darkness of Cuba. Jorge Piñón,a Cuban analyst from the University of Texas at Austin's Energy Institute,has issued a stark warning regarding Cuba's energy crisis. According to Piñón,the nation is running out of both time and money to resolve its deepening energy issues.

Does Cuba have an energy crisis?

Cuba isn't just in an energy crisis; the country's grid sits on the verge of systemic failure. The National Electric System,most of which was built after 1959,hasn't received the investment and maintenance it needs for 35 years--a consequence of Cuba's complex political and economic history.
