

Can I still communicate if the base station is disconnected

Why is my base station not connecting?

From the symptoms you describe, it sounds like the issue might be on the router side; perhaps a feature or setting is preventing the Base Station from staying connected. It might help to set up a Guest WiFi network locked to 2.4GHz only, which only your Base Station would connect to. Any resolution? I have same issue.

What causes a base station to go offline?

Troubleshooting the network connection, ensuring the base station is securely connected to the router, and minimizing signal interference can help resolve the issue. Power Supply Problems: Issues with the power supply, such as a damaged cord or a turned-off power strip, can result in the base station going offline.
