

Communication base station inverter dedicated set-top box

What is a multi-mode base station?

Multi-mode base stations provide a flexible platform for communications in DMR,P25,MPT,or conventional analog networks. The Tait TB7300 and TB9400 are software flexible,rugged base stations that are intelligent building blocks in an end-to-end solution,which includes base stations,terminals,and Tait management software and applications.

What is a portable base station & repeater?

Enhance connectivity between landline and radio communications while extending coverage of your two-way radio network. Portable base stations and repeaters offer compatibility with both conventional and trunking systems in VHF, UHF and 800-900 MHz, while providing on-site repeater capability to extend radio coverage in your network.

What is a tb9400 base station?

The TB9400 is MIL-STD designed and tested for reliability to mitigate network outages. With its intelligence and reliability,the TB9400 base station is the cornerstone of a Tait P25 Phase 2 system; helping to keep your staff safe and your organization running to its full potential.
