What if my base station is disconnected from WiFi?

THAT needs to be fixed. If you are subscribed to monitoring service, and if your Base Station is ever disconnected from WiFi, you will be sent a "WiFi Disconnected" warning notification to let you know. Of course, that wa...

Why is my base station not connecting?

From the symptoms you describe, it sounds like the issue might be on the router side; perhaps a feature or setting is preventing the Base Station from staying connected. It might help to set up a Guest WiFi network locked to 2.4GHz only, which only your Base Station would connect to. Any resolution? I have same issue.

How do I fix a SimpliSafe base station disconnect?

One thing that has worked for other users is to try setting up a Guest network with 2.4GHz enabled only, and connect only your SimpliSafe Base Station to it. If that works (i.e. you no longer see these regular disconnects), I would actually suggest moving over all your cameras as well, if you have any. @davidgmillman I'm having the same problems.

How do I know if my base station is working?

1. Ensure the base station is powered on and connected to a power source. 2. Check if the power light on the base station is solid green. 3. Make sure the Ethernet cable is securely connected to the base station and your Wi-Fi router or modem. 4. Check the internet connectivity LED on the base station. It should be solid green. 5.

How do I know if my base station is offline?

The physical base shows online w/ the three green lights on. The arlo app and web browser say " Your base station is offline. Check if it is powered up and connected to the internet". I have already disconnected the power and ethernet cable a few times, rebooted the router, and the issue persists. 2019-05-17 01:43 PM

How do you reassemble a base station?

Unscrew the security screw using a Philips head screwdriver. Twist the entire bottom panel counter-clockwise, and pull away to open the battery compartment. Take out one battery. This will fully power down the Base Station. Wait 3 minutes with the Base Station fully powered down. Reinsert the battery and reassemble the Base Station.

Change the base station that has Channel A to C. You want to always use Channels B+C. Let me know if that resolved it. Also, feel free to contact our customer support. ...
