

Can hydropower provide Guyana with utility-scale and small-scale capacity?

Hydropower has the potential provide Guyana with both utility-scale and small-scale capacity. Small-scale is discussed under "Isolated Grids" below. Guyana has a potential for 8.5 Gigawatt (GW) of hydropower on 33 hydropower plants (including storage capacity and run-of-river).

Which hydropower projects are being implemented in Guyana?

Guyana is currently implementing three small hydropower projects: a 150kW in Kato, the rehabilitation of Moco-Moco hydropower site, which would increase the capacity up to 0.7MW and a new 1.5MW hydropower plant in Kumu. Moco-Moco and Kumu hydropower projects will provide energy to Lethem grid.

What is a small-scale hydropower project in Guyana?

Small-scale is discussed under "Isolated Grids" below. Guyana has a potential for 8.5 Gigawatt (GW) of hydropower on 33 hydropower plants (including storage capacity and run-of-river). It is anticipated that Guyana will build two hydro plants over the next 20 years: Amaila Falls and another which is still to be identified.

Where is crude oil produced in Guyana?

Crude oil production in Guyana began in December 2019 in the Liza 1 field, ExxonMobil's first offshore discovery in the country. Esso Exploration and Production Guyana, an affiliate of ExxonMobil, operates the Liza 1 field and produces from a floating production, storage, and offloading (FPSO) vessel called the Liza Destiny.
