

Greek energy storage battery sales

How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MWfor subsidized battery storage in final auction Greece's third energy storage auction has been completed,with nine projects selected and a capacity of 188.9 MW.

How many projects have been awarded in Greece's first battery energy storage system?

The Greek Regulatory Authority for Energy has confirmed that 411.8 MWof projects have been awarded in the country's first standalone battery energy storage system (BESS) tender,which has attracted huge interest among developers. Investment and operating aid will be granted to 12 projects put forward by seven proponents.

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic,the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW,with over 500 projects granted a storage license.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects,but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started,with the first projects being awarded support for both investment and operating costs.

How many MW is a battery energy storage system?

It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions. In the latest bidding,nine projects with a four-hour storage duration have been selected for a total capacity of 188.9 MW.
