

# How to configure the base station battery

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

How do I install a base station?

You can install your Base Station almost anywhere. Place it on a flat surface or mount it on a wall (screws and anchors not included). Make sure it's in a spot that gets great wifi reception or near your router if you want to use an Ethernet connection. Install in an area where the siren is best heard throughout the location.

How do I connect my base station to the Internet?

You can connect your Base Station to the internet using wifi or an Ethernet cable. (Note: You can't use both wifi and Ethernet at the same time, but you can change the connection at any time.) Before you begin, download the Ring app and set up an account. Also make sure you have your wifi network name and password, or an ethernet cable.

What is a base battery system?

The Base battery system is built for performance and reliability. It combines a high-capacity lithium iron battery with intelligent software to optimize energy use. The Base battery system has three main components: the battery pack, inverter, and hub. The long white unit is the battery pack. We mount the battery pack on the ground.

How do I update my base station software?

The first time your Base Station connects to the internet, it will automatically begin a software update, which may take a few minutes. During the update, the light ring on your Base Station glows blue with a spinning yellow indicator. Once the ring is solid blue, the update is complete.

How do I set up a ring base station?

Before you begin, download the Ring app and set up an account. Also make sure you have your wifi network name and password, or an ethernet cable. Finally, make sure your phone or tablet has Bluetooth enabled. Open the Ring app to the main dashboard. and select your Base Station. Select a location, or add a new one.
