### Huawei double glass module

What is the best double-glass module?

When it comes to double-glass, Trina Solar's double-glass module is the most sought after product in the market. It was one of the first companies to promote and commercialize double-glass modules, and it has won industry-wide recognition for its high quality.

What is a double glass c-Si PV module?

Recently several double-glass (also called glass-glass or dual-glass modules) c-Si PV modules have been launched on the market, many of them by major PV manufacturers. These modules use a sheet of tempered glass at the rear of the module instead of the conventional polymer-based backsheet. There are several reasons why this structure is appealing.

What is glass-glass module technology?

In this paper a glass-glass module technology that uses liquid silicone encapsulationis described. The combination of the glass-glass structure and silicone is shown to lead to exceptional durability. The concept enables safe module operation at a system voltage of 1,500V, as well as innovative, low-cost module mounting through pad bonding.

Why is double-glass module a good choice for power plants?

The scale of installed capacity gets larger and larger. The power plants have also been built in more diverse environments, such as on fish farms, tidal flats, in deserts, etc. Double-glass module is not subject to potential induced degradation (PID) and boasts excellent durability, low permeability, long life cycleand other superior qualities.

Why should you choose double-glass module?

Double-glass module is not subject to potential induced degradation (PID) and boasts excellent durability,low permeability,long life cycleand other superior qualities. Its many advantages have enabled it to yield impressive results in China's Top Runner Program.

What is double-glass bifacial module in 2019?

The double-glass bifacial module in 2019 is going to spread its wingstarting from the domestic market. Under the pressure of subsidy-free plant development, such modules will be widely applied to utility-scale PV plants and then to distributed PV projects.

Join to apply for the Internship in Power Electronics for xPU and HPC Applications role at Huawei

The thickness of the front glass generally used for this type of structure is 3.2 mm. Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the ...
