

Should you add solar panels to your new home?

Adding solar panels to newly constructed homes can increase the sale price, attract new customers, and distinguish a homebuilder and their homes among competitors. A SETO-funded study found that homeowners across the country have been willing to pay a premium for homes with an average-size solar array.

Should you buy a home with solar panels?

A home with solar panels has lower electricity bills than an equivalent home without solar panels. Over the life of the solar system, the savings exceed the higher up-front price of the home. Homebuilders can share information with consumers about financing options and incentives described in the Homeowner's Guide to Going Solar.

Is solar energy a viable option for my home?

Here are some tips to help you decide if solar energy is a viable option for your home. According to the California Energy Commission, a solar system needs unobstructed access to the sun's rays for most or all of the day. The easiest way to check your home for solar viability is by typing your address into Google's Project Sunroof.
