Why is Malaysia reducing fuel subsidies?

There is also a strong environmental reason for reducing fuel subsidies, given that they encourage wasteful consumption and make it more difficult for cleaner types of energy to compete. The Malaysian government has recognized these problems and emphasized energy subsidy reform in its national development strategies.

Do Malaysia's subsidies benefit the poor?

The extent to which subsidies actually benefit the poor is discussed in Section Two of this Guidebook, but first we provide a brief overview of the types and size of Malaysia's fossil-fuel and electricity subsidies. Fossil fuels are non-renewable fuels such as coal, crude oil (petroleum) and natural gas.

Does Malaysia have 5G?

5G technology provides significantly higher data speeds and lower latency compared to previous generations (Shafinaz, 2017). It is the fifth generation of cellular network technology, and Malaysia began its 5G rollout in 2021. As of June 2023, approximately 62.1% of the country's population has access to 5G (Razak, 2023).
