

Portable charging power bank is so slow

Why is my power bank charging slowly?

The main reason a power bank charges slowly is if you are using a low A (amper) wall charger. Having a bad charging cable or a low-quality power bank could also be the reason. Luckily, we have listed everything you need to check so you can find and fix the problem.

Why does my power bank take so long to charge?

Overheating can slow down charging. If your power bank gets too hot, it throttles charging speed to prevent damage. Fix: Keep it in a cool place. Don't charge it on a bed or in direct sunlight. Avoid using it while charging. A 20,000mAh power bank will naturally take longer to charge than a 5,000mAh one.

Why is my battery charging so slow?

Low-quality power banks come with different problems, slow charging is one of them. You should avoid cheap and low-quality power banks and only go for trusted brands. Having an old power bank can also be the reason for slow charging. Lithium batteries come with a certain number of charging cycles.

How does a power bank work?

When you use your power bank to charge another device while it is connected to a power source, the power bank divides its output between charging the connected device and charging itself. This means that only a portion of the power bank's capacity is dedicated to charging itself, resulting in a slower overall charging process.

Can I charge devices while charging a power bank?

Some power banks allow you to charge devices while charging the power bank, but this significantly slows down the charging process. Fix: Charge the power bank alone for the fastest speeds. Match the charger's output wattage with the power bank's input rating. Use a certified fast-charging cable (e.g., USB-C to USB-C for PD charging).

Should I use a fast charging power bank?

Use a certified fast-charging cable (e.g., USB-C to USB-C for PD charging). If your current power bank charges too slowly, consider upgrading to a GaN power bank with USB-C PD. Check out our list of "Best Fast Charging Power Banks for Every Budget (2025)"! Avoid charging in extreme temperatures. Don't use the power bank while it's charging.
