

Portable emergency power supply series recommendation

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

Can a power station be used as an uninterruptible power supply?

Yes, a power station can be used as an uninterruptible power supply but with a big caveat. Many stations have automatic switchovers that reform the power sine wave in 20ms. Most dedicated UPS devices have a switchover of <5ms.

What should you consider when choosing a power station?

The last and lowest-weighted section to consider is portability. While we chose to weigh it for our overall score, the portability of a power station is often a byproduct of budget or preference. We did this intentionally to better compare portable stations against each other, rather than a portable station compared to an extra large solution.

Which power station is best for emergencies?

Our testing found the Oupes Exodus 1500 Power Station to be the best solution for most emergencies given its value, capacity, quality, and versatility. We also presented two other options: the Jackery Explorer 300 Plus which focuses on portability and the EcoFlow Delta 3 Pro which focuses on further expandable capacity.

What accessories should a small power station have?

Expansion, linking, or adding internal batteries do not have that power loss issue. Another big accessory for smaller power stations is a carrying case. These can protect the power station while you carry it and conveniently store cords and adapter cables for your equipment.

What is the best portable power station?

With a great power-to-weight ratio, the latest version of the Bluetti Elite 200 V2 is a great portable power station for powering a camper or providing backup power for the essentials. With its tremendous capacity, the EcoFlow Delta Pro 3 is truly capable of providing a whole-home backup without gas or solar panels.
