

Quickly charge outdoor power supply

How to charge a power station efficiently?

EFFICIENT CHARGING: Use the adapter included in the package to charge the power station from 0 to 80% in 2hrs, and use this power supply to charge other devices at the same time while charging, which could be equivalent to a charging strip, improving the efficiency of uses.

Which power station should I buy?

The Jackery 2000 Plus is the best power station for those who need ample power. While it is pricey at over \$2,000 list price, it has plenty of power, charges impressively fast, and won't let you down in case of an emergency. If your main need is charging devices like phones and laptops, our favorite is the Anker 521.

How long does it take to charge a power station?

Some of our best-performing power stations could achieve a full charge in under an hour, while others took upwards of fourteen hours. This is largely due to battery chemistry and the included charging input cables provided by different companies. Starting off, the Anker Solix C1000 was one of our more impressive units in terms of charging speeds.

How long can you use electricity during a power outage?

Electricity can be used safely even during long-term power outages caused by earthquakes and hurricanes. You can use the light (5W) for about 13 hours or more, use the smartphone for about 6 times or more, and use the PSP for more than 13 hours.
