

Why is Russia a good place to buy a battery?

Russia is a country with a large number of battery manufacturers that play an important role in the global energy industry. From electric vehicle manufacturers to solar energy companies, these companies are constantly innovating to develop more efficient and environmentally friendly batteries.

Why is Liotech expanding its market in Russia?

With increasing attention to green energy, the company is looking to expand their market not only in Russia but also in other countries looking to switch to more sustainable energy sources. Liotech produces lithium-ion batteries and is considered as one of the top 10 battery manufacturers in Russia.

What are CATL battery-powered energy storage systems?

CATL battery-powered energy storage systems provide energy storage and flexibility in power generation. Instant utilization and energy output due to battery electrochemical technology and the technology of electricity production using gas-piston units can be combined into a single most efficient system.

How does rewatt work in Russia?

Our software interacts with main platforms in Russia which supports OCPP 2.0.1 protocol and provides the ability to communicate through API with other systems of various types and complexity levels from PACS till SCADA. REWATT's customer service responds quickly and efficiently to customer requests.

“Brands” is a part of the “Made in Russia” catalogue where you can find a lot of useful information about Russian cultural, commercial, non-commercial, sports, territorial and social ...
