

What telecommunications systems are in Samoa?

Telecommunications systems in Samoa include telephone, radio, television and internet. In 2009, the Samoa-American Samoa (SAS) Cable provided inter-island communication, as well as enabling users in Samoa to access the ASH cable capacity and connect to the global networks.

#### Who provided technical assistance to Samoa?

Technical assistance was provided by the SPREP. The Government of Samoa wishes to acknowledge with gratitude all these or-ganizations. This report is the initial national communication that Samoa is obligated to submit to the Con-ference of the Parties to UNFCCC.

#### Is Samoa prepared for CC & SLR?

This National Communication clearly presents a setting that reflects a need for Samoa to act with prudence and vision regarding its preparedness to adapt and to impose mitigation meas-ures against possible adverse impacts caused by CC and SLR.

#### Does Samoa need a reliable database of good quality?

A reliable database of good quality is urgently neededby Samoa's planners and policy-mak-ers. Quality data is an indispensable ingredient for imaginative and prudent strategic plan-ning and policy-making. In the fight against the current and the projected CC and SLR,Samoa must possess an adequate database of good quality.

#### Are cc and SLR programmes still on hold in Samoa?

Although programmes at both levels are still on hold, there are indications that they will raise public awareness and enhance appreciation of Samoa's vulnerabilities to CC and SLR, hence, the need to adapt accordingly and to start implementing proper mitigation measures.

#### Is the Samoan government committed to cc and SLR?

Nonetheless, the Samoan Government is fully committed to the objectives and the cause of the Convention and its Protocol. The dialogue initiated between the Government and the other stakeholders in the CC and SLR issue has indicated a strong support for prompt action.

Samoa's decision to become a Party to the UNFCCC - is both wise and timely, and compil-ing a GHG inventory is an essential activity for Samoa. An understanding of the GHG sources and ...
