Does Senegal have a battery energy storage project?

The national electric utility of Senegal, Senelec, has signed a 20-year CCA with Infinity Power for a battery energy storage project.

Will a 40 MW battery energy storage system improve Senegal's national grid?

The agreement focuses on implementing a 40 MW battery energy storage system to improve the stability of Senegal's national grid. The system will be one of West Africa's largest upon completion in 2025 - with construction set to begin in early-2024 at the Tobane substation in Thiess - and will be integrated with the Taiba N'Diaye wind farm.

How will Senelec's new power plant help Senegal?

The planned facility, described as one of the largest of its kind in West Africa, will help Senelec stabilise the country's electricity grid and pave the way for further renewable energy growth in Senegal.

Where is a Bess project being built in Senegal?

The BESS is to be built at the Tobane substation in Thies, Senegal. It will be operated by Infinity Power's 158.7 MW wind farm in Senegal, Parc Eolien Taiba N'Diaye (PETN).

When will Senegal's Bess project start?

The BESS is expected to begin construction in early 2024 at the Tobane substation in Thies and is expected to become operational in 2025. Once completed, the system will be one of the largest of its kind in West Africa and will help Senegal avoid approximately 37,000 tonnes of carbon dioxide emissions each year. Have you read?
