

Are sodium-ion batteries the future of energy storage?

With companies like NextThing Technologies, Faradion, AMTE Power, and Natron Energy leading advancements, sodium-ion technology is set to redefine energy storage. The industry is moving toward scalable, safe, and cost-efficient battery solutions, making sodium-ion batteries a cornerstone of future energy infrastructure.

What is a sodium battery?

Sodium battery companies specialize in developing energy storage systems using sodium-ion technology as a cost-effective, sustainable alternative to lithium-ion batteries. Key players include Faradion (UK), Tiamat (France), HiNa Battery Technology (China), Natron Energy (US), and Altris AB (Sweden).

What are the top sodium-ion battery companies in 2025?

Here are the top sodium-ion battery companies in 2025: 1. Contemporary Amperex Technology Co., Ltd. (CATL) CATL stands at the forefront of Sodium-ion Battery innovation. The company's first-generation Sodium-ion Battery boasts an impressive energy density of 160 Wh/kg. Notably, it charges to 80% in just 15 minutes at room temperature.

Who makes sodium ion batteries?

Overview: A UK-based leader in sodium-ion technology, Faradion was the first company to commercialize sodium-ion batteries. Now backed by Reliance Industries, it is scaling up global production. High-energy-density sodium-ion batteries for EVs & grid storage. Stronger safety profile compared to lithium-ion.

What companies use sodium batteries?

Chinese telecom giants like China Tower use sodium batteries for 5G infrastructure backup, while European automakers test them for low-speed EVs. Grid operators value their fire resistance for large-scale installations near urban areas. How Are Startups Disrupting the Sodium Battery Market?

Are sodium ion batteries a viable alternative to lithium-ion?

With the global push for sustainable energy, sodium-ion batteries are emerging as a cost-effective, safe, and scalable alternative to lithium-ion technology. Leading battery manufacturers are developing next-generation sodium-ion solutions for applications ranging from home energy storage to grid-scale deployment.

The startup's first sodium-based grid-battery project has a novel design that cuts costs by virtually eliminating the need for temperature controls.

Here is the list of top Sodium Ion Batteries Startups 1. Natron Energy Manufacturer of sodium ion batteries

# Sodium battery energy storage companies

and energy storage systems. Its batteries survives deep discharge ...

About Storage Innovations 2030 This technology strategy assessment on sodium batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage ...

Abstract The future of sodium-ion batteries holds immense potential as a sustainable and cost-effective alternative to traditional lithium ...

Despite lower energy density than lithium-ion batteries, sodium-ion batteries present a potential for EV energy storage needs. Some prominent companies ...

Sodium battery companies specialize in developing energy storage systems using sodium-ion technology as a cost-effective, sustainable alternative to lithium-ion batteries. Key ...

This article ranks the top sodium-ion battery companies revolutionizing the industry and compares their innovations.

Check out the global top 7 sodium-ion battery manufacturers and sodium-ion battery companies with the best sodium-ion batteries based on Na-ion ...

In this piece, we'll look at seven companies in the battery industry that, along with Accenture, are pushing the state of sodium-ion battery technology. Read on to learn about ...

United States has the most number of companies in Sodium Ion Batteries (13), followed by China and India which have (6) companies. 2025 has seen the creation of 1 ...

These batteries also offer improved safety and show promise for grid storage and electric vehicles. As a result, sodium-ion technology is attracting global interest. This article ...

In this article, we will explain the top 10 sodium battery manufacturers in the world, such as CATL, BYD, KPIT Technologies, and ...

Discover the top sodium-ion battery companies to watch in 2024 and how they are leading in sustainable energy storage innovations.

Comprehensive analysis of global sodium-ion battery producers: \$30B market data, 160+ Wh/kg technologies, gigafactory maps, and procurement strategies for commercial buyers.

In this piece, we'll look at seven companies in the battery industry that, along with Accenture, are pushing the state of sodium-ion battery ...

Explore how sodium-ion batteries offer a cost-effective, affordable and sustainable future for energy storage.

Explore cutting-edge energy storage with the Top Sodium Ion Battery Companies. Unleash sustainable power solutions with groundbreaking technology.

This company overview provides profiles of the industry's innovators and covers the features, types, and highlights of their sodium-ion ...

Zhongkehai Sodium is a high-tech enterprise focusing on the research, development and production of sodium-ion batteries, a new generation of energy storage system. The company ...

The company focuses on low-cost, long-life, high safety, and high energy density sodium ion battery products, with potential applications covering low-speed electric vehicles, ...

Altris is collaborating with Clarios for automotive applications and Polarium for stationary storage, expanding its reach across Europe. The company's focus on safety, ...

The Sodium-ion Battery Companies Quadrant provides an in-depth analysis of the global sodium-ion battery market, highlighting key players, technological advancements, and ...

In this article, we will explain the top 10 sodium battery manufacturers in the world, such as CATL, BYD, KPIT Technologies, and many more. CATL is a leading global ...

Explore the top 6 sodium-ion battery companies in 2025 driving sustainable energy forward with groundbreaking innovations.

This company overview provides profiles of the industry's innovators and covers the features, types, and highlights of their sodium-ion battery technology.

United States has the most number of companies in Sodium Ion Batteries (13), followed by China and India which have (6) companies. 2025 ...

The Californian startup had bold plans to establish the world's first sodium-ion battery gigafactory but financial and market pressures have combined to render its business ...

Innovative sodium battery systems, designed for sustainable, efficient energy storage. Seamlessly integrates with solar panels, providing long-lasting, eco ...
