Can you get a solar tax credit?

The U.S. government offers a solar tax credit that can help you recoup up to 30% of the cost of installing a solar power system. The residential clean energy credit also covers other types of renewable energy projects undertaken by homeowners, subject to certain guidelines. To claim the solar tax credit, you'll have to fill out IRS Form 5695.

What is the 2025 federal solar tax credit?

The 2025 Federal Solar Tax Credit, officially known as the Investment Tax Credit (ITC), is a financial incentive for adopting solar energy in the United States. This dollar-for-dollar credit allows homeowners and businesses to deduct up to 30% of the cost of installing a solar energy system from their federal taxes.

How does the federal solar tax credit work?

For instance, when you're in the market for solar panels, the federal solar tax credit, also known as the Investment Tax Credit (ITC), aims to encourage investments in renewable solar energy. The federal solar tax credit equals 30% of the solar system's costs, reducing the taxpayer's federal income tax liability by that amount.

What is a solar investment tax credit?

This dollar-for-dollar credit allows homeowners and businesses to deduct up to 30% of the cost of installing a solar energy system from their federal taxes. By reducing the upfront cost of solar installations, the solar investment tax credit makes renewable energy more accessible and affordable.

How much do solar panels save on taxes?

Exactly how much you save ultimately depends on the cost of your project. If purchasing and installing solar panels results in eligible costs of \$30,000, for example, the tax credit can help you save \$9,000 in taxes. If your eligible costs only total \$15,000, on the other hand, the credit drops to \$4,500.

How does the solar tax credit work in 2022?

Congress implemented the Inflation Reduction Act in 2022, which brought several significant changes to the solar tax credit. Most notably, it extended the timeline to 2035 and increased the credit amount from 22% to 30% through 2032. Those who installed a system in 2022 and haven't claimed the credit yet can increase their credit amount to 30%.
