What are solar access laws?

Solar access laws can take different forms but include any law that protects your access to installing solar. That usually means banning a homeowners association from restricting solar panels in a way that significantly affects the cost of solar or the solar panels' performance.

What are solar policies & regulations?

Solar policies and regulations promote the widespread adoption of renewable energy sources, including solar PV systems, rooftop solar, and solar energy systems. These policies, implemented at local, state, and national levels by governments and regulatory bodies, provide a framework for developing and integrating renewable energy projects.

How does the United States regulate solar energy?

The United States has implemented various federal policies, programs, and regulations to drive the growth of solar energy across the nation. These initiatives aim to incentivize solar development, support research and innovation, and regulate the integration of solar power into the national energy grid.

Are solar panels legal in the United States?

No, although lacking access laws can allow homeowner associations (HOAs) and other organizations to deny installations, solar panels are legal everywhere in the United States. With that being said, unpermitted systems are illegal to operate in many American jurisdictions, even in states with solar access laws.

Should solar panels be regulated as universal waste?

EPA is developing a proposed rule to add solar panels to the universal waste regulations and to add tailored universal waste standards for lithium batteries. EPA is working on this rulemaking in part in response to a petition submitted by a broad coalition of industry associations to regulate solar panels as universal waste.

Are solar panels regulated under RCRA?

Solid waste is regulated federally under RCRA Subtitle D and through state and local government programs. The discarded solar panel, which is now considered solid waste, may then also be regulated under RCRA Subtitle C as hazardous waste if it is determined to be hazardous.
