

Why is Türkiye a key player in energy storage?

As global investments in energy storage systems continue to grow,Türkiye has positioned itself as a key player,with two cell production facilities and nearly 100 lithium-ion battery production factories of various scales actively operating across the country.

Will Türkiye's battery and storage power plants be approved next year?

However, Usta noted that despite draft regulations, the legal framework for battery and storage power plants is still evolving. The first approvals are expected next year. Tü rkiye's battery imports remained steady at around \$1.1 billion, similar to last year.

Is Türkiye ready for a new battery industry in 2025?

Looking ahead to 2025, Ustapredicted an influx of new companies, both domestic and foreign, joining the industry, a testament to Tü rkiye's potential for energy independence and global competitiveness. The association is set to host another battery summit in October next year.

How many battery plants are there in Türkiye?

With these new additions, the total number of battery production facilities in Tü rkiye will reach 11. However, Usta noted that despite draft regulations, the legal framework for battery and storage power plants is still evolving. The first approvals are expected next year.

Will Tü rkiye become a hub for battery technology?

Under the HIT-30 investment program, Tü rkiye seeks to become a regional hub for battery technology, with plans to build a capacity of 80 gigawatt-hours by 2030.

Will Türkiye get a battery approval next year?

The first approvals are expected next year. Türkiye's battery imports remained steady at around \$1.1 billion,similar to last year. Usta forecasted that exports would rise from \$39 million to \$48 million by the end of the year.
