

What to do if you live next to a communication base station inverter

Should you move a house near a cell tower?

Cell tower radiation is becoming more and more inescapable. Even those living in rural areas and finding that they live in a house near a cell phone tower. Moving is likely not a practical option, so at the very least, consider taking steps to protect yourself and your family from exposure.

Can you live near a cell phone tower?

Either way, we know that cell phone towers emit EMF radiation, both useful frequencies (the ones that provide us with service), and unwanted ones, such as energy lost through heat. Being constantly exposed to this radiation is the biggest risk of living near a cell phone tower, so just avoid it altogether if you can.

How can I reduce EMF radiation in my home?

Similarly, blocking radiation on the side closest to the cell phone tower should have an overall reduction in EMF radiation in the rest of the house. Another option, one that doesn't involve any DIY projects, is to simply rearrange your home so that the rooms closest to the cell phone tower are ones you'll use the least.

How do I keep cell tower radiation out of my home?

Barriers are another way to keep cell tower radiation out of your home. You can create an EMF-resistant barrier to hang on a wall or window by using EMF protection fabric. Simply trim the fabric to the desired size and shape, and hang it up.

How can I reduce the effect of cell tower radiation?

If moving isn't on the table for you and your family, there are some things you can do to at least reduce the effect of cell tower radiation. First, the goal is to keep as much cell tower radiation as possible from entering your home. One way to do this is by painting it with EMF paint.

How far should a person with EMF be from a source?

Based on findings like these, a minimum safety distance of 1/4 mile (1320 feet) might be considered prudent. And again, individuals with EMF hypersensitivity or other serious health issues may want to consider a much greater safety distance, perhaps a half mile, or even more. Table of Safety Distances from Various EMF Sources...

If your inverter is connected to a battery, there's a chance you could have an issue with your battery that is affecting the inverter. There will be information ...

For these kinds of health concerns, you might consider doubling the safety distances shown here. And most important, please listen to your own body, ...
